About the Spatial Data Science Conference

2020 brings two editions of the Spatial Data Science Conference, to London and New York, supporting the exponential growth of our community.

4 In 2019, the [Spatial Data Science Conference](#) brought together more than 500 people from a wide range of sectors and disciplines in New York at Columbia University.

Founded in 2017, it is the world's largest event for Data Scientists and Developers who specialize in working with Spatial Data. In 2020 there will be two editions: one in London and one in New York, both of which are epicentres for the Spatial Data Science community.

#SDSC20 will demonstrate how the future of GIS revolves around Spatial Data Science, featuring a series of keynote presentations and workshops that cover cutting-edge techniques in spatial modeling, machine learning, spatial statistics, geo-processing at scale, and novel uses of spatial data sets. Between talks and at the after-party, participants will have the opportunity to exchange ideas and foster new collaborations and partnerships.
